SCHEDULE OF WORK

SPECIFICATION OF HIGH MAST TOWER (12MTR)

Sr No	Specification
1.	<p>The scope of this specification covers the manufacture, transport, installation, testing and commissioning of the complete lighting system, using raising and lowering type of high mast towers including the civil foundation work. GMDC will only provide the supply point and the feeder cable of the required size, up to the bottom of the high mast. However, all items required for the safe and efficient operation and maintenance of the lighting system, including the high mast, whether explicitly stated below or not, shall be included by the vendor.</p>
2.	<p>Supply of 12mtrs High mast system (Polygonal cross section, 20 sided continuously tapered) with all accessories including but not restricted to the following.</p> <p>Mast shaft in two section, hot dip galvanized and suitable for wind velocity as per IS 875 part3(i.e. 180KM/hr at least</p> <ul style="list-style-type: none">(a) Head frame , steel wire rope of min.6mm dia. Double drum winch(b) Galvanized Lantern carriage arrangement suitable for 8nos 150w LED flood type luminaries & with all accessories.(c) Integral power tool installed inside base compartment for its operation <p>There shall be only one longitudinal weld in mast sections confirming to AWS. D 1.1(equivalent to standard BS5135) The masts are fabricated from special steel plates confirming to EN-10027-1 s 355JO or equivalent, cut to from a polygonal section as stated above</p> <p>The steel shall have following characteristics:</p> <p>Minimum Yield strength: 355 N/Sq.mm fro thickness < 30mm Tensile strength : > 490 N/Sq.m Minimum Elongation for thickness between 3mm and 30mm : 22%</p>
3.	<p>Supply of foundation bolts manufactured from special steel along with nuts, washers, anchor plate and templates</p>
4.	<p>Design, Supply and casting of suitable shallow foundation with M-15 concrete for the High mast considering safe soil bearing capacity at the site.</p>
5.	<p>Supply of 8nos 150w LED flood type IP65 luminaire OREVA/Crompton Greaves/Bajaj make with all accessories suitable for operation on 230V, 50Hz AC supply with 2years warrantee.</p>
6.	<p>Supply of twin dome aviation obstruction light with 1nos LED lamps</p>
7.	<p>Supply of 2nos GI pipe earthing station for high mast tower & 1for for LT panel controlling</p>

8.	Supply of control panel housing suitable control circuit for the operation of the mast, precision timer for automatic ON/OFF controls for the power tool Motor.
9.	Erection/Installation and commissioning of the high mast system comprising of foundation, mast and its accessories, aviation warning lamps , earthing, luminaires, control panel etc. with the help of suitable equipments.
10.	2sets of wiring diagram, O & M manual to be supplied along with the high mast.
11.	The LED flood type luminaries should be of OREVA/Crompton Greaves/Bajaj make only. The fitting offered should be suitable outdoor application and properly sealed to prevent rain water entry.
12.	General Features:
12.1	Winch: The winch shall be of completely self sustaining type, without the need for brake shoe, spring or clutches. Each driving spindle of the winch shall be positively locked when not in use. Individual drum also should be operated for fine adjustment of lantern carriage. The capacity, operating speed, safe working load, recommended lubrication and serial number of winch shall be clearly marked on each winch. The winch drums shall be grooved to ensure perfect seat for stable and tidy rope lay with no chances of rope slippage. The rope termination in the winch shall be such that distortion or twisting is eliminated and at least 5 to 6 turns of rope remains on the drum even when the lantern carriage is fully lowered and rested on the rest pads. It should be possible to operate the winch manually by a suitable handle by an integral power tool.
12.2	Head Frame: The head frame, which is to be designed as a capping unit of the mast, shall be of welded steel construction, galvanized both internally and externally after assembly. The top pulley shall be of appropriate diameter, large enough to accommodate the stainless steel wire ropes and the multi core electric cable. The pulley block shall be made of non-corrodible material, and shall be of die cast Aluminum Alloy. Pulleys made of synthetic materials such as plastic or PVC is not acceptable. Self – lubricating bearings and stainless steel shaft shall be provided to facilitate smooth and maintenance free operation for a long period. The pulley assembly shall be fully protected by a canopy galvanized internally and externally. Close fittings guides and sleeves shall be provided to ensure that the ropes and cables do not get dislodged from their respective positions in the grooves. The head frame shall be provided with guides and stops with PVC buffer for docking the lantern carriage.
2.3	Stainless Steel Wire Ropes: The suspension system shall essentially be without any intermediate joint and shall consist of only non-corrodible stainless steel of AISI 316 or better grade. The stainless steel wire ropes shall be of suitable size, the central core being of the same material. The overall diameter of the rope shall not be less than 6mm (7/19 construction). The thimbles shall be secured on ropes by compression splices. Two continuous lengths of stainless steel wire ropes shall be used in the system and no intermediate joints are acceptable in view of the required safety. No intermediate joints/terminations, either bolted or else, shall be provided on the wire ropes between winch and lantern carriage.

12.4	Electrical System, Cable and Cable Connections: A suitable terminal box shall be provided as part of the contract at the base compartment of the high mast for terminating the incoming cable. The electrical connections from the bottom to the top shall be made by special trailing cable. Size of the cable shall be minimum 5core 2.5sq.mm copper. At the top three shall be weather proof junction box to terminate the trailing cable. Connections from the top junction box to the individual luminaries shall be made by using 3core 1.5sq.mm copper flexible PVC cables of reputed make. The system shall have in – build facilities for testing the luminaries while in lower position. Also suitable provision shall be made at the base compartment of the mast to facilitate the operation of internally ousted. Electrically operated power tool for raising and lowering of the lantern carriage assembly. The trailing cables pf the lantern carriage rings shall be terminated by means of metal clad, multipin plug and socket provided in the base compartment to enable easy disconnection when required.
12.5	Power Tool for the Winch: A suitable, high powered, electrically driven, internally mounted power tool, with manual over ride shall be supplied for the raising and lowering of the lantern carriage for maintenance purposes. The speed of the power tool shall be to suit the system. The power tool shall be supplied complete with suitable control. The capacity and speed of the electric motor used in the power tool shall be suitable for the lifting of the design load installed on the lantern carriage. The power tool mounting shall be so designed that it will be not only self supporting but also aligns the power tool perfectly with respect to the winch spindle during the operations. Also, a handle for the manual operation of the winches in case of problems with the electricity operated tool shall be provided
12.7	Making of trench of 2ft(depth) x 150m(long) for Laying of 4x4sq.mm copper stranded armoured cable & back filling after laying of cable.
12.8	Supplying/laying/termination at both end of 4x4sq.mm x150mtrs long hard copper stranded armoured cable any IS make to be laid in trench
12.9	Party has to made LOGO of GMDC & write SAUJANYA by GMDC & same is stick to high mast tower – size will be given by us.
