Sufficient points properly distributed over the entire area shall be located and levels taken so that accurate contouring can be done at places of sharp curvature or abrupt change in direction and elevation, points selected shall be close to each other. Salient points on ridge lines and valley lines shall also be measured.

The Contractor shall submit survey maps of the site to the scale indicating grid lines and contour lines, demarcating all permanent features like roads, railways, waterways, buildings, power lines, natural streams, trees etc. Each area should have two originals one showing spot levels and contours with grid lines and other with grid lines, contour lines and permanent features.
2. The Mauza and Khasra map (original plan, not the photo copy) of the area should be collected by the Contractor from the local revenue authorities and survey grids and all topographic features shall be superimposed on the maps. The scale of this map should be same as that for the Mauza/Khasra map or as directed by Site -in-Charge.
